LOYOLA UNIVERSITY

NEW ORLEANS, LOUISIANA

Bachelor of Science in Music Industry Studies, Minor in Business - Graduated May of 2014

ADDITIONAL SKILLS

- Experience with Audio Engineering, Production, Mixing, and Mastering.

Hello,

After researching Experis and the services that your company provides, I firmly believe that I would be a wonderful addition to your team. It has always been my desire to have the opportunity to work in a technology-driven environment with people who share similar passions and values as me. I am confident that this is that opportunity.

In college, I took a few classes that allowed me to build websites using HTML and CSS. I discovered after college that I wanted the chance to make a more profound impact on the world, and that idea lead me to become a Web Developer. I then decided that I would pursue a career with my first stop being at The Iron Yard. It was there that I obtained all of the necessary tools to become a skilled programmer, an engaging learner, and a better communicator.

While at The Iron Yard, I learned to build fully functional single-page web applications using JavaScript frameworks (Backbone.js & React.js). I fell in love with JavaScript after having demoed a project with my team and discovering the power of it's abilities. It was there that I developed an eye for overall user experience and a unique style of design.

I consider myself to be well-spoken, personable, and most of all reliable, which leads me to believe that I would be a great candidate for your team. I am always thinking about my team first and I tend to get along great with everyone. I believe that with my dedication to Experis and your team that I can make these the center of my life.

Thank you for your consideration and I look forward to hearing from you.

Daniel Opatich
